SPRING 1944 FALL 1943

# <u>WHOLESALE</u>

141 S. E. 65TH AVENUE PORTLAND 16. OREGON

Mt. Hood — Sandy River

EVERGREENS - - - Propagators and Growers

#### TERMS AND INFORMATION

The Sherwood Nursery Co. are propagators and growers of evergreen trees and shrubs, specializing in the production of conifers and broad leaved evergreens. Plants can be shipped from our nursery from about September 30, throughout the fall, winter and spring to about May 1. Earlier shipment than May is advised for most varieties.

#### TERMS:

Our terms are strictly net cash. Note carefully the following conditions:

- 1. We pay all express or parcel post charges on lining out stock to any point in the United States. (Lining out stock for this purpose may be defined as any stock not listed as B&B, or specimen, but not including Thyme, which is not classed as lining out stock).
- 2. We will reserve stock for future fall or spring delivery when at least one-fourth of the purchase price accompanies the order. Balance C.O.D.
- 3. At least one-fourth of the purchase price must accompany all lining out orders. Balance C.O.D. Payment in full required on all B&B shipments.
- 4. The prices quoted are net cash prices but ten per cent discount will be deducted from the list price of all lining out stock when delivery is made at our nursery.

Prices on our B&B stock are F.O.B. at our Portland Nursery.

Positively no order for lining out stock will be accepted for less than 25 plants of the same size and variety.

Prices quoted in the 10, 100, or 1000 lots apply to one size and one variety only.

We reserve the right to substitute grades when necessary and the difference is not too great.

Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped.

5. The prices quoted herein will hold throughout the coming nursery year, (fall and spring), unless unforseen tax, regulation or increased shipping costs due to war conditions should compel modification.

#### PACKING:

No packing charge.

Many small balled grades can be shipped safely, packed bare roots in moss thereby cutting down shipping costs.

Our method of packing insures the arrival of plants in perfect condition at any place in the United States.

#### RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner, and we make no guarantee, either expressed or implied, that the plants will grow or give specific results. All shipments are at the risk of purchaser after being delivered to the carrier. We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

SHERWOOD NURSERY COMPANY 141 S. E. 65th Ave., Portland, Oregon

#### TO REACH NURSERY:

Drive east on East Stark Street highway to Southeast 72nd Avenue.

OR, drive east on East Burnside to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city by either one of these two main highways leading eastward.

WE pay all express or parcel post charges on all shipments of lining out stock to any point in the United States. We pay all packing costs. Our terms are strictly net cash. At least one-fourth of the purchase price must accompany all orders, balance C.O.D. Payment in full required on all B&B shipments.

# GENERAL LIST

Including Conifers and Broad Leaved Evergreens, Deciduous Shrubs and Rock Plants.

#### Abelia grandiflora (Glossy Abelia)

Foliage glossy green, flowers white with pink blush. A beautiful, hardy evergreen. Splendid for foundation and mass plantings. Blooms all summer and is an attractive shrub both in flower and foliage. After the flowers have fallen the persistent purplish sepals are still attractive.

	Each	10	100	1000

#### Abelia grandiflora sherwoodi (Sherwood Dwarf Abelia)

A dwarf abelia, not only the plant but the leaves and the flowers as well being about half the size of grandiflora. Flowers pink and white, same as grandiflora. Thick-branching and very compact. A choice little plant, esspecially where space is a factor, supplying a long felt need. Originated by us and has proven a great favorite.

and has proven a great lavoritor

#### Abies nobilis (Noble Fir)

The name noble describes this magnificent tree perfectly. A native of the Coast and Cascade mountains of western Washington and Oregon where its dignified appearance is set out in striking effect. The branches grow in whorls with great regularity along the main stem of the tree and are broadly spreading toward the tips. The foliage is usually a beautiful bluish green in color. It is valuable for landscaping purposes and the best of all for the production of Christmas trees. 4- 6 inches not transplanted....

1000 \$..... 56

Ajuga reptans rubra (Purpleleaf Bugle)

A worthy rock plant and ground cover. Has a rich green, slightly bronzed foliage, which is heavy and cleaves close to the ground. The blue flower spikes are 6 inches tall, are numerous and appear in the spring. There is the impression of pleasing and perfect harmony between blossoms and foliage. Evergreen.

1 year plants.....

#### Arborvitae—See Thuja

#### Arctostaphylos patula (Green Manzanita)

An irregularly branched, yet nicely rounded and shapely broad leaved evergreen. Height 2 to 4 feet. Needs little pruning as the natural growth gives the impression of tailored shrub. The bark of the stems is smooth, rich brown and mahogany in color. The leaves are about 1 inch in diameter, almost perfectly round, and have a delightful appearance of freshness summer and winter. Is most impressive when it grows in masses, as it grows on the slopes of the Oregon mountains where it is native. Leaves retain their refreshing verdant greenness under exceedingly dry and trying conditions. Here is a shrub of great beauty, and one which survives great extremes of heat, cold and drought without injury.

Arctostaphylos uva-ursi (Kinnikinnick)

Sometimes called Bearberry. Uva, Latin for grape, ursi for bear. A lovely low trailing evergreen, flourishing in a wide range of latitude and altitude. In Oregon it is at home from the splash of the waves of the Pacific to timberline in the Cascade mountains. Withstands almost any degree of cold. Has large red berries, roundish glossy leaves and grows in thick masses, completely covering the ground, rocks, walls or old logs over which it trails. Exempt from pests, good the year round and in every respect decidedly pleasing and satisfying. Considered by some to be the best ground cover known.

Azalea sherwoodi (Sherwood Orchid Azalea)

This is a hybrid hinodegiri and our own introduction. It has been awarded a prize in a rare plant exhibit. We have been developing and trying it out for several years in our nursery where it has attracted much attention from visitors. Foliage about the size and gloss of the Hinodegiri Crimson Azalea, but the plant is somewhat hardier than the hinodegiri. Flowers are a clear lavender with speckled throat, completely cover the plant, and are large for a dwarf azalea. This evergreen fills the need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden. Mass plantings in gardens or on slopes and terraces are unexcelled.

## BERBERIS (BARBERRIES)

A native of South America from Chili to Patagonia. Evergreen, reaching a height of about 3 feet. Foliage is deep green, glossy, and compact, and the small, neat leaves are serrated and holly-like. In early spring the plant is a gorgeous mass of tiny, bright, orange-colored flowers. Very decorative. 12-18 inches twice transplanted......B&B .40 3.60 32 Berberis dulcis nana Often called Dwarf Box Barberry. Foliage deep green, compact. evergreen with orange flowers. One of the best low hedge and border plants. Height 18 inches to 2 feet. 6- 8 inches twice transplanted......B&B .40 3.60 32 The above B&B grade can be handled bare roots. If so ordered deduct 5 cents per plant. Berberis julianae (Wintergreen Barberry) One of the best upright barberries. The leaves are large, foliage heavy and the thorns which are long and sharp, are well hidden by the foliage. Some of the leaves remain green through the winter, others turn brilliant scarlet and are mingled among the green leaves in the fall and winter in a most showy and attractive manner.

#### Berberis verruculosa

Height 3 to 4 feet. One of the new introductions from Western China. The small glossy leaves form a mass of dark evergreen foliage, which turns to a gorgeous red in colder climates. Flowers golden yellow. Flourishes in heat or cold, and is one of the hardiest and best of barberries.

#### Calluna vulgaris aurea (Golden Heather)

Possesses fine golden foliage that heads up in many of the stems in moss like clusters. During the fall and winter the foliage takes on beautiful tinges of red which are intermingled with green and gold. The multitude of flowers are in soft pleasing lavender shades. These blend with the green and gold of the foliage in producing one of nature's daintiest and most charming color effects. Appeals to all who see it. Hardy, new. Height about 18 inches.

# **Erica mediterranea hybrida** (Darley Heath) (Also called Hybrid Heath, Christmas Heath or Winter Heather)

This is one of the most attractive and desirable plants grown in our nursery. It is hardy and dwarf, seldom reaching more than 1 foot in height. It has beautiful, dense, dark green foliage and from early winter to spring is covered with such a profusion of lovely, purplish blossoms that the foliage is practically obscured. It is not unusual to see this brave little plant blossoming through the snow. Being a winter bloomer, hardy, equally good for rockeries, borders, groups and masses, it should be included in every planting.

6-	8''			 	11	

#### Kinnikinnick—See Arctostaphylos

#### Laurel—See Kalmia, Aucuba, Laurocerasus, Laurus

#### Laurocerasus Iusitanica (Portugal Laurel)

A native of Spain and Portugal, Lusitania being the ancient name of the region almost coincident with Portugal. Grows into a tree in the land of its nativity, but farther north reaches the proportions of a fine shrub. Unexcelled among broad leaved evergreens for hedges. The older plants are magnificent when covered with a mass of spikes, 6 inches long, of white, fragrant blossoms in the spring. Dark green, glossy foliage, large leaves. A hardy strong growing plant which stands shearing well. A beautiful shrub especially when planted with other evergreens.

## Laurocerasus officinalis (English Cherry Laurel)

This well known plant is a native of southeastern Europe to northern Persia. It is one of the most popular hardy evergreens in Europe. It has broad, glossy leaves of charming freshness and is a strong vigorous and rapid grower. Fine for hedging, and gives quick results and satisfaction in either hedges or planted singly. Large growing shrub.

ne	uges or planted singly. Large growing sillub.

Laurus zabelli (Zabells Laurel)	
Grows 4 to 6 feet high, wide spreading and is covered in the spring of the	
year with large spikes of white scented flowers. Foliage rich, glossy green	
little affected by cold or dry weather. Hardier than English or Portugal	
Laurel. Being hardy, semi-dwarf and a good bloomer it meets a need in	
landscaping and will unquestionably be used a great deal as it becomes better	
known. Rare. Each 10 100	1000

Leucothoe catesbaei (Drooping Leucothoe)	
One of the most ornamental of the broad leaved evergreens. Semi-dwarf and	
hardy. A good under-cover plant or facer for taller shrubs. Makes fine	
sprays for florists' use. Large, glossy foliage, turning to gorgeous shades of	
red and bronze in the fall and winter. White flowers produced in clusters	
in the early spring. Erect, but with tips of branches drooping.	
6-12 inches once transplanted	72
12-18"	104
Libocedrus decurrens (Incense Cedar)	
A shapely pyramid in form, with fine, fan-like foliage, that is dense, and a	
beautiful glossy green. The foliage is also delightfully fragrant. The bark is	
bright cinnamon-red. Incense Cedar is native Oregon to California and	
western Nevada. Flourishes on the cold eastern slopes of the Cascade moun-	
tains and in dry, rocky soil. A tall growing tree. As an ornamental, they are	
grown chiefly for their handsome, fragrant evergreen foliage and charming	
habit of growth. The perfect symmetry of growth from the ground to tip of	
the tree is a characteristic that places decurrens almost in a class by itself, the only other conifer that is comparable being Sequoia gigantea.

#### Pinus montana mughus compacta (Mugho Pine)

The name montana means pertaining to the mountains. A dense, stout dwarf evergreen, of unquestionable hardiness. Coming from the high mountains of central Europe it has been dwarfed as trees frequently are that are storm swept for centuries along bleak coast lines or in rugged mountains, and only the hardiest and fittest survive. Such is the selected Mugho Pine, without a peer as a dwarf mountain evergreen. Mature trees reach a height of 4 to 5 feet but having a spread of 6 to 8 feet. It grows with numerous branches and can be kept sheared to small size if desired. Very dense, compact and deep green summer and winter. Our trees are grown from selected seed of the best type and are of very uniform guality.

the state of the same distribution quantity.	Each	10	100	1000

## Pinus resinosa (Red Pine, Norway Pine)

A tree growing to a height of 70 feet and sometimes to twice that height. It has spreading branches that form a pyramidal head. Has dark green, lustrous foliage. A lumber tree, and has been referred to as one of the most ornamental pines for northern parks and public grounds. Range from Newfoundland to Pennsylvania.

10-12 inches not	transplanted		 9	
12-15""		•	 10	

## Pinus sinensis (Chinese Pine)

A medium sized conifer, native of western China. Dense foliage, which clothes even the stems and branches. Needles 2 to 4 inches long, charmingly brilliant green, soft to the touch and of soft, silky luster. The foliage is a distinctive and decidedly pleasing shade of green, and is in this respect unquestionably the finest of any conifer that we are growing. Its general effect is just right. It could hardly be surpassed for large banks and hillside plantings. Hardy into New England in sheltered locations. Rare. Splendid hedge subject.

#### TAXUS (YEWS)

Taxus baccata (English Yew)

This is the old favorite of English gardens. Native of Europe and north Africa to the Himalayas. Deep green, rapid growing in good soil, very dense. Will do quite well in poor soil and in dry situations. One of the best of all hedge plants, as it will stand any amount of pruning. Thrives in either sun or shade. The English Yew has this great advantage in hedges, in common with all the yews, the trees make uniform growth all along the line regardless of sun or shade. Hardy evergreen.

Taxus baccata aurea (Golden English Yew)  A rare plant and one of the most handsome of all yews. Foliage bright golden, diminishing in color late in the season. Hardy, slow growing, globe shaped, compact. Seldom reaches a height of more than 5 or 6 feet.	
Each   10   100	1000 \$
Taxus baccata fastigiata (Irish Yew)	
The well known slender growing yew, so frequently used by discriminating architects where choice, narrow landscaping effects are sought. When planted against pillars and columns or in similar situations, it gives an air of perfect culture and refinement. The tree is shapely in form, and the foliage is rich dark green and dense. The name, baccata fastigiata, (berry-bearing and columnar) is an exact description. The large bright red berries, profusely intermingled with the foliage in the fall, enhance the beauty of the tree to a marked degree. Rather slow growing, but long lived and substantial. It adds tone and dignity to homes, parks, public buildings and all other plantings where it is used.	
4- 5 feet four times transplantedB&B 6.75	
Taxus baccata procumbens (Prostrate English Yew)  One of the beautiful prostrate types, being of broad vase-shaped form of growth, low and heavily branched. Has deep green foliage. Is a strong vigorous grower, and of far more than ordinary attractive appearance. Occupies a valuable place in landscaping where low growers are desired because of its commanding form and color. Does equally well in sun or shade. Rare.	
12-15 inches three times transplantedB&B 1.10 9.90 89	
This B&B grade can be handled bare roots. If so ordered deduct 5 cents per plant.	
Taxus baccata repandens (Spreading English Yew) Similar to the Prostrate English Yew, but of deeper, darker foliage, and flatter and more spreading in habit of growth. A plant 6 feet across would be only about 2 feet tall. A rare and desirable plant.	
12-15 inches three times transplantedB&B 1.10 9.90 89	
This B&B grade can be handled bare roots. If so ordered deduct 5 cents per plant	t.
Teucrium chamaedrys (Chamaedrys Germander)  A beautiful evergreen rock plant somewhat resembling heather. It reaches a height of about 1 foot with a spread of 3 feet, and is a bouquet of rosy blooms in midsummer. Extremely hardy, holding its bright, glossy green color in the coldest weather. Has a fragrant foliage, and will add beauty wherever low blossoming plants are desired. Drought resistant, and takes the place of heather in hot dry sections. Good results can be obtained only by shearing immediately after blooming.	
6-10 inches once transplanted 8	64
Teucrium chamaedrys prostratum (Creeping Germander)  A low growing form spreading into a dense mat 6 inches high. Foliage dark green, flowers lavender. Rapid growing, desirable ground cover.	
6-10 inches once transplanted 8	64

# THUJA (ARBORVITAES)

111007 (7.1120)	
Thuja occidentalis (American Arborvitae)	
Native New Brunswick and Manitoba to North Carolina and Illinois. An old, standard favorite. Grows in compact form, narrow pyramid in shape and attaining a height of 60 feet. Withstands low degrees of temperature, makes fine low hedges or taller wind breaks. A tree that has always been justly esteemed.  Each 10 100 6-12 inches not transplanted	1000 \$ 56 88
Thuja occidentalis aureo-variegata (Goldspot Arborvitae)	
A rapid growing tree, very desirable for specimen or mass planting. The foliage is beautifully sprinkled through with gold, not too much, but just enough to give the tree an aspect of cheerfulness on the darker days of the year. Possesses delightful freshness and color throughout the seasons. Planted in rows or hedges, either trimmed or untrimmed, it is a most satisfactory tree.	
6-12 inches once transplanted	80 120
Thuja occidentalis pyramidalis (American Pyramidal Arborvitae)  A most desirable arborvitae of narrow columnar growth, dense and compact without trimming. Very hardy and a favorite in almost any planting. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges are desired requiring but little space, Pyramidal Arborvitae has no counterpart. The hedge becomes a solid wall of green from 4 to 20 feet in height and occupies no more than 2 feet in width. For hedges, trees should be planted one and one-half feet apart. No pruning is needed other than topping. A Pyramidal Arborvitae hedge requires scarcely any care.

This B&B grade can be handled bare roots. If so ordered deduct 5 cents per plant	
Thuja occidentalis woodwardi (Woodward Arborvitae)	
A dwarf, compact tree, assuming the globe form. Admirably fitted to low plantings, or for shaping taller plantings to the ground. Almost perfectly symmetrical and if at all favorably planted will take good care of itself, and because of its pleasing form and foliage and easy growing qualities will always be in demand.	
12-15 inches three times transplanted	
Thuja orientalis (Oriental Arborvitae)	
A pyramidal or bushy tree, of which there are many garden forms. Attains a height of 25 feet, and is native from Persia to eastern Asia. In the original form, and particularly in the garden varieties, it has added much to American gardens.	
6-12 inches once transplanted	64 88

Thuja orientalis aurea nana (Berckmans Golden Arborvitae)  Doubtless the most popular dwarf, golden arborvitae known. Almost globe shaped, very compact, foliage vertical and bright gold. Very formal in appearance. Being a universal favorite and hardy, there are few plantings in which it cannot be used to advantage. It always adds tone and color. Height 4 to 5 feet.  Each 10 100  12-15 inches three times transplanted	1000 \$
Thymus serphyllum coccineus (Crimson Thyme)  Dense evergreen carpet, completely covered in spring with crimson magenta flowers, making a solid dazzling mat of royal purple. A marvelous plant. The best of the thymes. For lawn purposes plants should be set about 12 inches apart. One square foot of this sod may be divided into approximately 35 plants.	
Per square foot	.50 cents
Thymus vulgaris (Common Thyme)  Small, fragrant, evergreen plant, having a spread of 2 to 3 feet. Leaves are small, and the foliage is so dense that the plants appear as masses of dark green foliage. The flowers are light lavender and grow on numerous spikes 3 to 6 inches in height. An excellent plant for garden borders and rockeries. Grows into a nice, shapely plant in a season or two, and releases its spicy fragrance with the slightest disturbance.  4- 6 inches twice transplanted

Tsuga canadensis (Canada Hemlock)  Native New Brunswick, Wisconsin and south to Alabama. A well known conifer of graceful, pleasing habit of growth, and regarded by some land-scape architects as one of the best of conifers. Perfectly hardy, withstanding low temperature without injury to tree or foliage. Foliage is heavy and attractive, needles are short. Is naturally broadly pyramidal in form but can be grown to a rounded head, and lends itself well to pruning into hedges.  6-12 inches not transplanted	56 72
6-12 inches twice transplanted	80 120
12-18"	120
Vaccinium ovatum (Evergreen Huckleberry)  First discovered by the Lewis and Clark expedition at the mouth of the Columbia river in 1805. One of the great beauties of the plant is the thick, waxy leaves, of blended shades of green in spring and summer, and changing to a mixture of deep crimson and bronze in fall and winter. Its winter and spring colors utterly defy description. It is a rounded plant, many branched and of unusual density. Strong, vigorous grower, and stands unlimited shearing. Can be sheared into a hedge from 1 to 5 feet tall. Does well in either sun or shade, but is at its best in partly shaded exposures. A hardy evergreen shrub of surpassing merit and a fine hedge plant.

#### Veronica hecknori

A very unusual evergreen with russet green foliage in summer turning to a rich golden color in the winter season. The growth appears in the form of a multitude of symmetrical upright golden spikes, attaining a height of 12 to 15 inches. Makes a fascinating border or low edging plant, and could be used to advantage as a part of almost any low planting. It is a unique type. Hardy.

#### Wintercreeper—See Euonymus

#### Xerophyllum tenax (Pine Lily, Bear Grass, Squaw Grass, or Indian Basket Grass)

A native of the Cascade and Rocky mountains. Grows into a graceful symmetrical bunch in weeping form and might be described as a low fountain in grass, about 18 inches high and 2 to 3 feet across. Out of the center of this grassy bunch grow the tall stems 3 to 5 feet in height and from 1 to as many as 20 in number, crowned with the long creamy-white lily heads of matchless beauty. The leaves which are grass-like are evergreen, and unusual as it may seem, it is an evergreen belonging to the lily family. Mountain slopes and meadows, clad in fields of these lilies are a thrilling picture, which once seen will never be forgotten. The grass is said to have been used by the squaws in early days in weaving baskets. Perfectly hardy, rather slow growing but long-lived. Should be planted in groups, and in the open where it is partially shaded during the day for best results. Will not bloom well if too shaded. The fine bunches of long, silky grass are very ornamental when the lily is not in bloom. A plant with a future, and rare in American gardens.
